

Airport Manager Report

July 2024

Our AVGAS sales price is still competitive leading to steady sales of fuel. We anticipate a new fuel shipment in early August at this sales rate. Our price is \$5.39.

City Commission approved awarding the engineering services for the PAPI project in April. We have received the contract proposal from Mead & Hunt for this project as an agreement was reached with MDOT on provided airfield obstruction data and accepting liability.

Our seasonal groundskeeper, Rodney Schumaker is doing a good job taking care of the airport mowing and overall grounds maintenance.

Luke and DPW crews have completed four days of crack sealing on the main runway. This will help extend the life of the pavement until the planned resurfacing in 2026/27.

Thanks!

Gabe Ambrozaitis
